

Arden 20

Clay based Grease

TECHNICAL DATA SHEET

Description

Veedol Arden 20 is non-soap clay based chemically stable grease.

Features/Benefits

- Can withstand very high temperatures without softening or melting.

Application

- Recommended for plain and anti-friction bearings where extremely high temperatures are encountered.

Caution: In bearings operating at temperatures above 200°C the grease should be replenished at frequent intervals.

Typical Properties:

Test Parameters	Test Method	Typical Values
Texture	--	Smooth
NLGI Consistency	--	2
Soap type	--	Non-soap
Worked Penetration, 60st @25°C	ASTM D 217	275
Drop Point, °C	ASTM D 2265	258

Properties mentioned above are typical only and minor variations which do not affect the product performances, are to be expected in normal manufacturing.
