

Armol 2

Non soap Grease

TECHNICAL DATA SHEET

Description

Veedol Armol 2 is non-soap type, chemically stable grease with Molybdenum.

Features/Benefits

- Can withstand very high temperatures without softening or melting.
- Possesses high load bearing capacity.

Application

- Recommended for shock load conditions with high temperature.

Typical Properties:

Test Parameters	Test Method	Typical Values
Texture	--	Smooth
NLGI Consistency	--	2
Soap type	--	Non-soap
Worked Penetration, 60st @25°C	ASTM D 217	276
Drop Point, °C	ASTM D 2265	255

Properties mentioned above are typical only and minor variations which do not affect the product performances, are to be expected in normal manufacturing.
