

Ruspro DWX-32

Rust Preventive Oil

TECHNICAL DATA SHEET

Product Description:

Veedol Ruspro DWX-32 is a solvent based corrosion preventive oil with good dewatering properties. The product on evaporation of the solvent leaves a soft greasy protective film.

Features/ Benefits:

- De-aromatised hydrocarbon solvent having mild odour, shows good water displacing properties.
- Good water displacement and penetrating properties with high stability against acidic and alkaline contaminations that enables a long bath-time which helps reducing operational cost.
- Contains powerful corrosion inhibitor, suitable for severe conditions that provides reliable protection of components.
- Free from heavy metals such as Barium that helps improve environmental profile.
- Good mechanical film strength provides highly finished work and improves product quality.

Application:

- Veedol Ruspro DWX-32 is recommended for use in severe conditions where high degree of protection is required.
- It is ideal for protection of machined components prior to storage or transportation.
- Veedol Ruspro DWX-32 can be applied by brush or spraying and is most effective if the articles to be protected can be immersed in a dip tank.
- This has to be for sea worthy shipment.

Typical Properties:

Characteristics	Typical value
Appearance	Clear, Brown Liquid
Flash Point	> 38 °C
Protection - Indoors	15 months
Protection - Outdoors	6 months

Properties mentioned above are typical only and minor variations which do not affect the product performances, are to be expected in normal manufacturing.
