

Anepro grease

TECHNICAL DATA SHEET

Description:

Veedol Anepro is a premium quality grease that offers excellent protection from rust and corrosion and is particularly well suited to cope with wet and corrosive environments. The product is fortified with anti-wear and oxidation-resistance additives that ensure long service life.

Features/Benefits:

- Effective protection against rust, corrosion, and oxidation.
- Excellent resistance to water wash-out.
- Non-corrosive to iron, steel, copper, and their alloys.
- Ensures longer life of bearings.

Application:

- Recommended for roll neck bearings in steel rolling mill.
- Suitable for lubrication of anti-friction and plain bearings.
- Also recommended for the lubrication of some industrial equipment bearings, where water contamination is constantly present.

Typical Properties:

Test Parameter	Test Method	Typical Test Value	
		Anepro 11	Anepro 22
Texture		Smooth & Buttery	Smooth & Buttery
NLGI Consistency		1	2
Worked penetration, 60 stroke @ 25°C	ASTM D217	322	278
Base oil Kinematic viscosity, mm ² /s @40°C	ASTM D445	160	160
4 Ball Weld Load, kg	ASTM D2596	250	250
Water Wash out, % max	ASTM D1264	5	5

The properties mentioned above are typical only and minor variations which do not affect the product performances, are to be expected in normal manufacturing.
